

SUMMARY

1. Installed Python 3.6 and Anaconda on Ubuntu 16.04.
Installation of igraph package with conda run.
2. Class which process folders/files of specified directory.
Tested with different base directories. Worked well for self created folders/files and small directories.

Directory:

/usr - OSError: [Errno 40] Too many levels of symbolic links

/sys - PermissionError: [Errno 13] Permission denied

/home/agnieszka

Attributes are added by calling vertices with their names (paths).

Size os.stat(/path).st_size

Last change time.ctime(os.path.getmtime(/path))

3. Class responsible for graph's database handling
Table has 3 columns. Vertex name, size and last change time. Last two columns are equal null for folders. As a table name base directory is used.

	name	size	lastChange
	Filter	Filter	Filter
1	/home/agnieszka	NULL	NULL
2	/home/agnieszka/test.c	72	Sat Nov 11 14:13:47 2017
3	/home/agnieszka/project	NULL	NULL
4	/home/agnieszka/project/test2.py	951	Tue Jan 30 11:37:53 2018
5	/home/agnieszka/project/test.py	4663	Tue Jan 30 21:03:37 2018
6	/home/agnieszka/project/desc	NULL	NULL
7	/home/agnieszka/project/desc/desc.odt	9873	Tue Jan 30 13:23:30 2018
8	/home/agnieszka/project/test.db	53248	Tue Jan 30 21:01:13 2018
9	/home/agnieszka/project/help	NULL	NULL
10	/home/agnieszka/project/help/read.txt	20	Mon Jan 29 17:41:49 2018
11	/home/agnieszka/project/help/exc	NULL	NULL
12	/home/agnieszka/Public	NULL	NULL
13	/home/agnieszka/test	8608	Sat Nov 11 14:14:38 2017

4. Method of searching for files shows:
 - files which obtain given string itself
 - Files which have a given string in their path

```

(/home/agnieszka/Cprog/array1.c', 520, 'Thu Nov 16 09:53:21 2017')
(/home/agnieszka/Cprog/array1', 8776, 'Thu Nov 16 09:53:28 2017')
